INVESTIGATION COMPLETE — Adil Monu, May 11 2026

CLASSIFICATION: True Positive — Benign (Attack Failed)

SUMMARY:

16 alerts triggered by 7 distinct IPs across 7 countries (USA, Hong Kong, Vietnam, Netherlands, Mexico, Moldova) conducting a coordinated SSH brute force attack over 75 minutes. Peak volume of ~1,820 attempts recorded at 06:00. Usernames targeted: root, admin, user, zjw and others.

INVESTIGATION FINDINGS:

- KQL confirmed zero successful authentications
- All attempts failed at [preauth] stage
- No evidence of lateral movement
- Pattern consistent with distributed botnet activity
- Threat intel: IPs span multiple high-risk geolocations

RESPONSE ACTIONS:

- No containment required (attack self-mitigated)
- Recommend: Add attacker IPs to blocklist
- Recommend: Consider fail2ban on SSH port

CLOSURE: True Positive — No Breach Confirmed
May 11, 2026 1:55:39 PM

INVESTIGATION COMPLETE — Adil Monu, May 11 2026

CLASSIFICATION: True Positive — Benign (Attack Failed)

FINDINGS:

- 7 attacker IPs across USA, HK, Vietnam, Netherlands, Mexico, Moldova
- 2,326 brute force attempts over ~75 minutes
- Peak volume ~1,820 attempts at 06:00 AM wave
- Usernames targeted: root, admin, user, zjw + wordlist
- Pattern: Coordinated distributed botnet
- KQL breach check: ZERO successful authentications confirmed
- All attempts failed at [preauth] stage

DETERMINATION: No breach. Server not compromised.

RECOMMENDED ACTION: Block IPs, implement fail2ban, enforce SSH key-auth only.
